

You now know all about special characters now - in particular, how to print them to your screen. In this task, you'll get some more practice with these types of characters.

Your goal is to print Dennis Ritchie's famous quote to the screen just as shown below. To make this task a bit harder, you are only allowed to use **one printf statement** in your entire program. Be sure not to omit anything and not to print anything extra.

### Output:

```
Dennis Ritchie said:
```

```
"The only way to learn a new programming language is by writing programs in  
it."
```

*Warning:* You need to print everything exactly as shown above, including the attribution.

### Note

You may submit as many solutions as you wish. Only your highest score will be kept.
